

The Spirit of Precision

## PRINCIPLES

The success of an enterprise is governed by several factors. Technology and skill alone is not enough to maximise performance and success. The people who are working in the enterprise are of paramount importance, so we strive for good relationships with one another. Ensuring understanding and agreement in their aims and objectives will lead to mutual success.

- We are as a team enthusiastic and can trust one another.
- We are professionals; target oriented and are ready to take responsibility.
- We are precise and dependable in what we do and say and give information openly and thoroughly.
- In company with one another we are fair, upright and in joint partnership.
- We are engaged, helpful and respect others.
- We acknowledge and further the achievements of every single one and strive for our mutual success.
- We are ready for change and see in it the opportunity to further develop ourselves personally.
- We are acting customer oriented and economically, and with the environment in mind.
